Regression Analysis - GDP and Life Expectancy

Life Expectancy & Adult Mortality per Country

Life expectancy

737.8 1,320.6

• 300 • 6,000
• 2,000 • 8,801
• 4,000

SUMMARY OF DASHBOARD.

Life expectancy is lowest in the continent of Africa and highest in first world countries such as Canada and parts of Europe.

The prevalence of HIV/Aids is highest in the Southern part of Africa.

There is a simple linear regression between GDP and Life expectancy, although the maximum GDP did not have the highest life expectancy.

Adult mortality is highest in Africa with Life Expectancy being lowest at the same.

Hiv/Aids

• 0.1
